

Topic Covered –Caring for People with Dementia in Acute Care Settings

Registered General Nurses/Health Care Assistants

This course covers three modules and is delivered over a two day period. Seven key areas that could be improved in the care of people with dementia have been identified.

These are :

- 1 Building on staff knowledge and experience of dementia
- 2 The experience of accident and emergency departments
- 3 Better screening and assessment
- 4 Promoting a person friendly hospital environment
- 5 Promoting person centred care
- 6 Considering the impact of our attitudes and approaches to people with dementia
- 7 Care planning with dementia in mind

Module 1 - Person Centred Approach

Module 2 - Person Centred Communication

Module 3 - Person Centred Assessment

This training is designed to be interactive, the contents include video footage, discussion and taught component. This training is flexible in that, should specific aspects of care need to be addressed more fully, for example, understanding delirium and its impact on care (as outlined in the Dementia Action Plan for Wales), then the package is able to accommodate this.

Current price for two day training is - £1100 – including all materials
