

Thank you for taking part in the iSupport for dementia carers study. We thought you might like to know about the **global impact** of your contribution so far.

Right now, 33 countries are adapting iSupport in 31 different languages.

Your contribution is for **the first study in the UK** examining how well iSupport works; ensuring it is appropriate for young people; and producing a Welsh language version of iSupport.

Thank you very much for your time and efforts.

Sincerely,
Professor Gill Windle and the iSupport study team
